BRAKE BLEEDING ADVANCE SYSTEM

**BRK  
600**

**BRK600 is the newest, universal brake bleeder especially designed for a professional use. BRK600 is equipped with a robust integrated and independent pump for the extraction of used oil.**

**Working even on hard-to-access trays is made easy using the long 7 meter spiral hose. An integrated filter protects the pump from dirt particles and various residues. Changing the brake oil on a professional level also includes washing the reservoir. For this the old, exhausted and dirty oil is extracted from the fluid reservoir.**

**The extracted oil is collected in the transparent 5 liter tank. BRK is equipped with a second high quality pump for injecting new oil.**

**BRK600 is also equipped with a continuous pressure regulator up to 4.2 Bar. The pressure regulator has a safety lock to avoid unintentional manipulations.**

**The bodywork of BRK600 is particularly robust, as well as all the details such as wheels, hoses and connectors, for a particularly intense and continuous use.**

## BRAKE BLEEDING ADVANCE SYSTEM

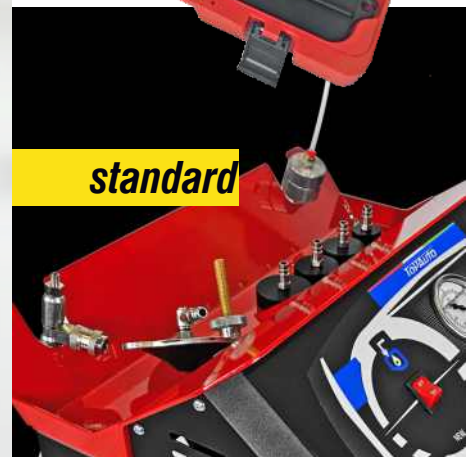

# BRK 600

### Technical Features:

Compatible Liquids:	Pre DOT - DOT2 - DOT3 - DOT4 - DOT5 - DOT5.1 - DOT6 - DOT6.1 - LHM
Capacity of NEW fluid tank:	5 lt standard (predisposition for tanks up to 25 lt)
Capacity of USED fluid tank:	5 lt
Operating pressure:	0 – 4 bar
Pump flow:	1 lt/min
Length of charging pipe:	7.5 m
Length of suction pipe:	7.5 m
Length of power supply cable:	3 m
Power supply:	230V 50-60 Hz
Noise:	< 70 dB (A)
Dimensions:	67x54x90H cm
Weight:	35 Kg

*The working pressure can be set on the **pressure regulator** (secured against unintentional manipulation) and read on the pressure gauge.*

*The **7 meter length of the filling hose** is able to satisfy any type of requirement.*
