Requirements for installation of „VDO Driver" App on your Android™ Smartphone

1. You own an internet ready Smartphone with Android™ 2.3.X or 4.XX
2. You already own a Google™ account for using the Google™ Play Store.

Download der „VDO Driver" App on your Android™ Smartphone

1. Open the Internet Browser of your Smartphone and type in following internet url: www.dtco.vdo.com . You can also find the internet url on the package of your SmartLink.
2. Navigate to the SmartLink product page.
3. On the SmartLink product page you can a find a „ Link" to Google Play Store. As an alternative you can find a „QR Code"on the SmartLink product page. This code you can scan via a QR-Code Scanner App. You will be directed then immediately to the Google™ Playstore, where you can directly download the „VDO Driver" App.
4. After you have confirmed the installation, the App will be automatically installed on your Smartphone and is ready to use.
