Change of pre fleece for several air filters

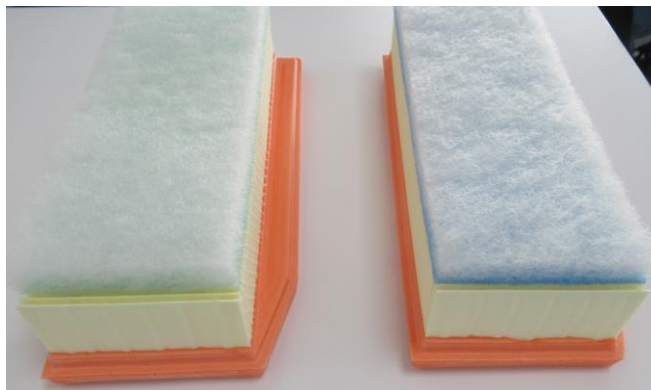

For a number of air filters in the MANN-FILTER portfolio there will be a change of the pre fleece. This change has only a visual effect, as the color of the fleece is light blue instead of dark blue. In the matter of function the filter is fully equal to its predecessor and fulfills reliable the MANN-FILTER quality.

The following filters are affected by the change:

C 28 105/1	C 37 009
C 2859	C 31 027
C 3088/1	C 21 116/1
C 28 160/1	C 31 116
C 30 011	C 17 237/1
C 24 024	C 29 168
C 27 030	C 35 160/1
C 24 036	

New filter element
